VAISHNAVISONAWANE

+918262830608 ⋄vaisnavijsonawane@gmail.com ⋄LinkedIn:Vaishnavi Sonawane

OBJECTIVE

Driven and detail-oriented Computer Science student with practical experience in AI-powered tools and innovative tech projects. Eager to contribute to real-world applications through internship opportunities that foster learning, creativity, and collaboration,while strengthening core programming and problem-solving skills.

EDUCATION

B.Tech in Computer Science and Technology, 2024-2027
Usha Mittal Institute of Technology, Mumbai
Third year. B.Tech CGPA: 8.43

Diploma in Electrical Engineering, 2021-2024
Veermata Jijabai Technology of Institute,
Mumbai Aggregate: 87.00%

TEHNOLOGIES

- Programming Languages:java,Python(basic),MySQL
- Tools Platform:VSCode,GoogleColab

SKILLS

- Problem-Solving&Critical Thinking
- Team Collaboration & Communication
- Leadership & Event Coordination

EXPERIENCE

Intern (During diploma) in Mumbai Monorail,Mumbai June2023-July2023

- Learned how electrical systems work in trains and stations.
- Observed the working of the Master Control Unit(MCU),the core system that monitors and manages all train operations using real-time data.
- Learned how computer-based control systems manage vehicle movement, braking, doors, and communication between stations.
- Gained exposure to real-time system monitoring,safety protocols,and automation workflows in a public transport network.

PROJECTS

- **CreditShield LOS – AI-Powered Loan Origination System and Credit Risk Prediction (Current B.Tech Project)**
  Developing an AI-powered loan assessment system to predict credit risk, analyze bank statements, and evaluate borrowers' repayment capacity. Uses XGBoost, Random Forest, and RAG.

  Tools: Python, XGBoost, Random Forest, RAG, SQL

- **Dynamic Budgeting Tool with AI Prediction (S.Y. B.Tech Project**
  Built a smart budgeting tool that predicts future expenses using machine learning and visualizes financial trends.

  Tools: Python, Google Colab, Pandas, ipywidgets

- **Footstep Power Generation System (Diploma Project)**
  Designed a smart tile-based system to generate electricity from footsteps using kinetic energy and store power in a battery for mobile charging.

  Tools: Dynamo, Diodes, Capacitor, USB Circuit, Mechanical Gear System

- **Solar-Powered Wireless Charging Vehicle (Diploma Project)**
  Built an RC-controlled solar-powered vehicle with wireless charging capabilities to transfer energy to other electric vehicles, promoting sustainable energy sharing.

  Tools: 6V Solar Panel, 4.5V Battery, RC Module, Wireless Coil, DC Motors

EXTRA-CURRICULAR ACTIVITIES

- Participated in college fests and competitions,show casing team work and creativity.
- Department Head,Marathi Cultural Committee–VJTI,showcasing leadership,event management,and teamwork skills.
